

# RAJASTHAN STATE POLLUTION CONTROL BOARD

4] Institutional Area, Jhalana Doogari Jaipur

फोन नं.: 0141-2711263, 2716802, ई-मेल: member-secretary@rpcb.nic.in

## Office Order

It is a mandate of State Board to monitor ambient air quality and stack emissions as the pollutants released in the environment have a detrimental effect on the human health & environment.

Stack monitoring is a procedure for sampling of flue gas stream from an emission point. It measures emission of industrial waste or pollutants entering the environment. Stack-emissions monitoring is an inherently hazardous occupation. There are many hazards associated with carrying out a stack emissions test in industry. Therefore, the basic principles of good health and safety practice must be applied.

Accordingly, "Guidelines for ensuring health and safety of employees carrying out Stack Monitoring in industries or other places" are being issued for necessary action and compliance of all the concerned. These guidelines describe the requirements of stack monitoring infrastructure in industries and the steps to be taken to minimise the risks associated with stack monitoring.
